INCORPORATED IN 1968,

Desert Dry has grown to become a leader of excellence in the waterproofing industry. At its inception it served homeowners by correcting basement water infiltration problems through walls and floors, and to date there have been approximately 35,000 remedies of this type performed. With precision and superior workmanship, the company continues to do retrofit work as well as related new construction work to prevent water seepage before it occurs.

Desert Dry President, David Reiff, and his staff stand ready to provide the highest quality waterproofing and basement refinishing in the industry. They offer excellence and superior service by using products made of only the finest materials along with the expertise of trained and knowledgeable craftsmen.

If you have experienced a wet basement so that you were afraid to finish it or furnish it, perhaps we can help. A dry basement gives you pleasure now and returns the cost when you sell by getting the true value of your home.

We service residential, commercial and governmental customers and agencies.

SERVICES OFFERED

- Drain Tile Systems
- Backhoe Excavation
- Sump Pumps
- Foundation Coating
- Underpinning
- Structural Supports
- Landscaping Corrections
- Swales
- Retaining Walls

Making Sick Basements WELL Is What We Do! SUCCESSFULLY, FOR THE PAST 35 YEARS!

The cause of wet basement problems vary from house to house. Many problems do not show up for several years after the house was built.

The builder may have applied an inexpensive tar coat on the walls that just passed the building code.

Other causes can include backfill that may have contained debris from the building site (such as lumber and paper) that interfered with proper compaction, or the grading and selection of the building site may have been poorly planned.

Mother Nature may have played a part in your problem with your basement if underground springs changed course or tree roots spread. Even termites in the foundation can cause the problem of a wet basement.

Correcting the problem early may save thousands of dollars in damage to the foundation due to hydrostatic pressure that causes the walls to crack, buckle or shift, as well as additional losses sustained from water damage to heating systems, appliances, lifted tiles, mildewed carpet and loss of the full use of your basement.

Desert Dry offers V.A. and F.H.A. property certifications, serving residential and commercial customers as well as government agencies. Our prices are fair and competitive.

A dry basement in your home gives you pleasure now and will return the cost when you sell, because you will be gaining the full use and value of your home.

Don't pay for space that could be used for better living. Don't ignore a problem that could cost you thousands of dollars to repair later.

REFERENCES — Residential

Mr. & Mrs. Gerard M of Olney, MD — This letter is to acknowledge our extreme satisfaction with the work ethic, and the execution of the work performed by Desert Dry employees, Walter and Arturio, for their water prevention job completed at my residence . . . the work was so exceptional, I felt the need to write this letter.

Mr. Carroll L of Leesburg, VA — Desert Dry was a great experience. Not only did they do the expected work for waterproofing, but they cleaned up without me even being there. I would recommend them to anyone.

Mrs. Sherry C. of Laurel, MD — Desert Dry redid my driveway and entrance to my home a number of years ago with concrete pavers. Not only has it enhanced and increased my property value, but it looks as good as the day it was done.

Reta M. of Annandale, VA — The job went beautifully. The guys did a great job. The clean-up was so good you couldn't even tell where they had to cut through the lawn and curb for a drainage pipe. In fact, the neighbors even commented on Desert Dry's excellent work.
